STARFISH RETROSPECTIVE

KEEP DOING

- Inter-member support after finishing the assigned work
- Testing parallelization
- Lots of communication

LESS OF

- Suggesting upgrades before integration
- Overestimating task effort

MORE OF

- Getting acquainted with Git
- Following the assigned tasks
- Warning about which tasks are being taken on after finishing the assigned work
- Following coding conventions

STOP DOING

- Refactoring other members' pieces of code without warning

START DOING

- Establishing a packaging system
- Making use of patterns before writing code
- Reducing task dependencies between team members
